2 Novelty of the claims, Art. 33(1) and (2) PCT

2.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.  
Document D1 discloses all the features of claim 1, see fig.1.

Furthermore, also the features of claims 2-6 and 16 are anticipated by D1, see in particular the shape of the pole modules in figure 1 and 3, which clearly show a neck and collar formation.

2.2 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 13 and 15 is not new in the sense of Article 33(2) PCT.  
Document D2 discloses the features of claim 1 together with the features of these claims 13-15, see column 3, lines 28-53.

3 Inventive step of the claims, Art. 33(1) and (3) PCT

The remaining claims are new, but lack an inventive step, as defined in Art. 33(3) PCT, since their features are known from the other documents cited in the search report.

- 3.1 The feature of a securing line is known from D3, see figure 3 and 4.
- 3.2 The features of clamping the traffic light between formations extending outwards from the light connector is in principal known from D4. To give these extensions the form of lips would then be obvious to a skilled person, since it increases the holding force of the arrangement.
- 3.3 The feature of arranging a number of sockets in an adaptor is known from D5.
- 3.4 A combination of either D1 or D2 with any of these documents would bring a skilled person to the features of the dependent claims, respectively.
